Brand Positioning

Innovative, Bold, Agile, Friendly

Our mission is to help customers scale sourcing excellence. Keelvar is building disruptive technologies that will revolutionize the procurement industry. We are customer obsessed and our passion is to make the lives and jobs of our customers easier and better. We are forward thinking, not afraid to take risks or do things differently. We work smart and fast, but always consider the customer first. And we do it with a smile on our face and with a warm and friendly approach.

Tone of Voice:

Simple, Concise, Direct, Friendly, Authentic

Our goal is to make life easier for our customers and users and we want our customers to know they can trust us. Therefore we communicate clearly, concisely but with a warm and friendly tone. No fluff, no jargon. Get to the point fast and be direct and authentic.

Visual Identity:

Our visual identity encapsulates the unique characteristics of Keelvar. We are an innovative, experienced, agile and forward-thinking SaaS company with a warm and approachable nature. We use clean and crisp designs with soft edges to convey innovation and technology. Our diverse color palette and patterning show our warmth and friendliness. Our visual identity helps us bring insight, creativity, and energy to our core areas of strategy, identity, and industry.

Photography:

Photography and imagery should feel authentic and as natural as possible. We avoid using corporate stock photography and instead opt for real-life scenarios that are natural and authentic. Our goal is to capture the essence of our brand in every image we use, which means conveying our warmth, approachability, and innovation.

Logo:

Clear Space:

We recommend using your best judgment when considering spacing around our logo. The guides here provide a minimum clear space. We ask for this to be considered as elements within the clear space may be mis-interpreted as part of the logo and lead to inconsistency across touchpoints.

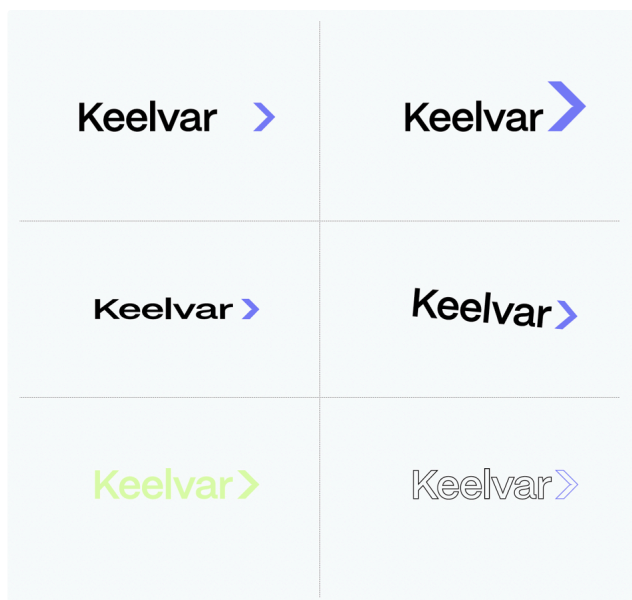

The Chevron:

✗ Logo Don'ts ✗

We love our logo and think it's perfect the way it is. Please don't change and alter it in any way, as it's important that our representation is consistent and to a high standard. It's simple, don't shrink it disproportionately, don't change its colour; don't give it a drop shadow, don't rotate it, don't outline it, and please don't put on a background with poor contrast.

Typography

For Headings & Subheadings

PP Mori Regular

PP Mori Font is a geometric sans-serif type family inspired by contemporary Japanese design, best suited for editorial, graphic design and branding. Mori was created to satisfy reading experience, it's compatible for text and also display, fit for headers, titles, posters, websites, brands, apps and other various design or creative projects.

For large and regular body text

Universal Sans Display

Universal Sans features six variable axes with an extensive range of stylistic alternates to allow for an infinite number of unique outcomes. While there are limitless possibilities, the typeface system adheres to fundamental typographic principles to ensure the end product is cohesive and functional.

For Google Docs or Slide presentations

Please use the Google Font - **Roboto**

Primary		
	Grape RGB: 121 119 255 CMYK: 62 57 0 0 PANTONE: 2123 C #7B78FF	
	Midnight RGB: 32 12 88 CMYK: 100 100 27 34 PANTONE: 273 C #210D59	
		
		
Secondary		
	Jungle RGB: 32 49 53 CMYK: 82 63 60 58 PANTONE: 5467 C #213036	
	Menthol RGB: 209 255 159 CMYK: 19 0 15 0 PANTONE: 2281 C #D1FF9E	
		
		
Tertiary		
	Canary RGB: 252 197 7 CMYK: 122 99 0 PANTONE: 7548 C #FCC408	
	Canary Light RGB: 253 238 147 CMYK: 2 2 53 0 PANTONE: 2001 C #FCE994	
		
		

Primary.

In print always use rich black and white as printing on off white paper will help flatten the black and make it feel softer.

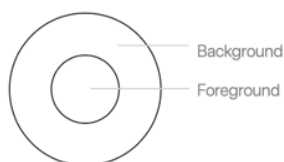

Secondary.

Suggestions have been made but the ideal scenario would be one in which a variety of colours can be used based on the content and theme of issue.

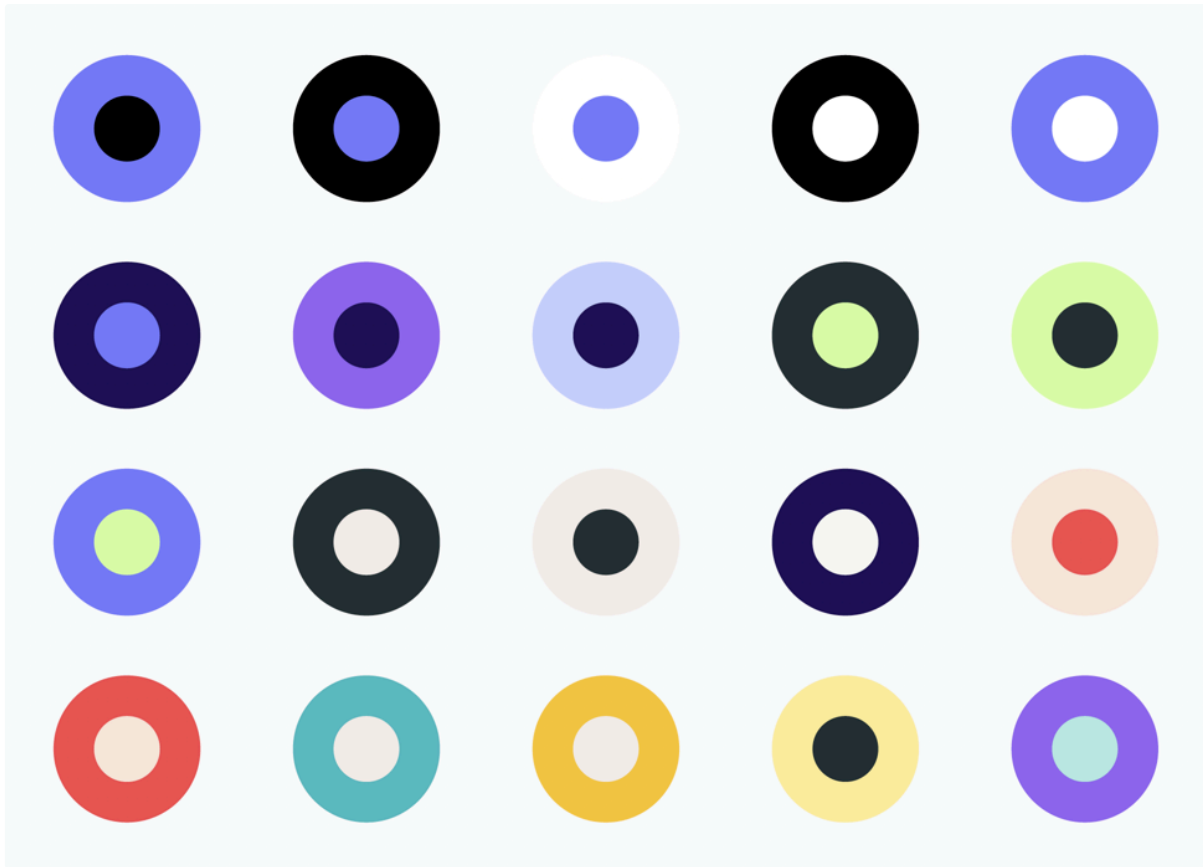

Tertiary.

These colour to be used sparingly and never for a direct product

Pairings

The concept of the pairings is to create a glowing visual effect that has a certain digital quality to it. The pairing can be used with shapes or text or lines to inject a pop of brand colour into designs. Please do not create additional colour pairings and do not mix colours.

Gradient

We use gradients sparingly as to not over do them. But when suitable please only use the following colour combinations to create gradients.

To create the gradients, use the colour references below and apply them to the 'Mesh Gradients' website:

[Mesh](#) | Create beautiful mesh gradients

Grape
RGB: 121 119 255
CMYK: 62 57 0 0
PANTONE: 2123 C
#7878FF

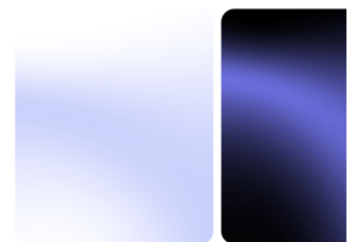

Alabaster
RGB: 255 255 255
CMYK: 0 0 0 0
PANTONE: WHITE
#FFFFFF

Midnight
RGB: 32 12 88
CMYK: 100 100 27 34
PANTONE: 273 C
#210D59

Lavender Light
RGB: 197 206 255
CMYK: 20 15 0 0
PANTONE 2707 C
#C4CFF

Patterns

To add texture to large areas of colour the Keelvar icon can be used to create pattern. We also use a dotted pattern to create variation.

Product Icons

Updated icons for our 3 products: Sourcing Optimiser, Autonomous Sourcing and Rate Manager. these are to be used across all marketing materials and in-app to align brand and product consistency. They have been designed to be intuitive & recognizable, modern & clean, with no scalability limitations.

All 3 icons in .png and vector form [assets here](#).

[Sourcing Optimiser](#)

[Rate Manager](#)

Bullseye: *Precision, efficiency and focus.*

The ideal point where all variables align perfectly—quality, cost, timing and reliability, representing optimal outcomes.

Autonomous Sourcing

Workflow: *Streamlined, execution and interaction.*

An end to end visualisation for users. Connecting SO & RM.

Rate stack: *Structure, scalability and control.*

A centralised contract file database for rates that brings order, transparency and flexibility.
